

Health IT Quick-Stat #21

Workforce Development Programs Student Employment after Program Completion

2010 - 2013

*Note: Survey data from the third cohort of CCC students only (see Notes below for more information)

Data:

Workforce Development Program Students	Type of Employment	Survey	Percent Employed
Community College Consortia	Any Employment	Baseline Survey	70%
		Follow-up Survey	74%
	Employment in Health IT or have Health IT Responsibilities	Baseline Survey	32%
		Follow-up Survey	66%
University-Based Training	Any Employment	Baseline Survey	64%
		Follow-up Survey	89%
	Employment in Health IT or have Health IT Responsibilities	Baseline Survey	35%
		Follow-up Survey	64%

Summary:*Community College Consortia Program*

Of the 19,733 students trained by the Community College Consortia Program, 74 percent were employed in any employment 6 months after program completion; moreover, 68 percent were employed in a health IT job or had health IT related responsibilities.

University-Based Training Program

Of the 1,704 students trained by the University-Based Training Program, 89 percent were employed in any employment 6 months after program completion; moreover, 64 percent were employed in a health IT job or had health IT related responsibilities.

Final evaluation of the Workforce Development Programs conducted by NORC of the University of Chicago. For more information on the evaluation and its methods, please see the Final Report here:

Notes:

[1] The Baseline Survey was conducted as students completed the program. The Follow-up Survey was conducted 6 months later.

[2] Survey data of CCC students in health IT employment or employed in a job with health IT responsibilities 6 months after program completion is for the third cohort of CCC students only. The first two cohorts asked students whether they were employed in health IT. The third cohort had a follow-up question asking students that answered 'no' to health IT employment, whether they had health IT responsibilities.

[3] Visit the [Workforce Programs Dashboard](#) for additional program data.
